EDUCATION

Colorado School of Mines, Golden, CO

May 2026

B.S. in Computer Science, GPA 3.39

ENGINEERING SKILLS

- **Languages:** Python, TypeScript, Java, SQL, C++, HTML/CSS
- **Web/API:** React, FastAPI, REST APIs, Pydantic, Tauri
- **Databases/Data:** PostgreSQL, MySQL, Microsoft SQL Server, Pandas
- **Tools:** Git/GitHub, Linux, Bash, VS Code, Godot, Jira, GitHub Copilot, ChatGPT/Codex
- **Practices:** Agile/Scrum, debugging, code reviews, OOP/SOLID, UML, documentation

EXPERIENCE

Field Session Software Engineer — Qualcomm / Colorado School of Mines

May 2025 - June 2025

- Built a FastAPI backend with 5 REST endpoints, Pydantic validation, and relational data access across MySQL and Microsoft SQL Server
- Integrated APIs with a React frontend; debugged data flow, validation, and UI behavior across the stack
- Served as Scrum Lead for a 4-person team; ran ceremonies and managed sprint scope in Jira
- Turned recurring demo feedback into UI/workflow revisions and wrote README handoff documentation

Co-Founder — WeRDigital, Littleton, CO

Oct 2023 - Aug 2024

- Delivered custom WordPress/CSS websites for small businesses from requirements gathering through client-facing pages
- Built repeatable workflows for pricing, service planning, website delivery, and new service exploration

PROJECTS

Student Loan Analyzer (Tauri, React, TypeScript)

- Built a multi-screen loan planning app with local persistence, repayment tracking, CRUD workflows, and scenario comparison
- Implemented strategy planning and result views to help non-technical users compare repayment options clearly

Tipsy Taxi — Arcade Driving Game (Godot)

- Built a polished final-semester arcade game with responsive controls, collision handling, scoring, UI feedback, and restart/failure states
- Tuned movement, difficulty, and gameplay flow through rapid playtesting under a short course deadline

Market Signal Summarizer — Frontend (Team Project) (React, TypeScript, REST APIs, OpenAI)

- Built a React/TypeScript dashboard with reusable components for summaries, market signals, and profit/loss indicators
- Integrated the UI with backend endpoints and coordinated API contract changes with teammates

RELEVANT COURSEWORK

- Operating Systems, Machine Learning, Database Management, Algorithms, Software Engineering
